

## **.NET DEVELOPER**

You are a skilled web site developer who is enthusiastic about the Internet and emerging web technologies. Collaborating with the strategic and creative teams is second nature. You love programming for the web and consider yourself an experienced developer. Microsoft .NET/C# is your preferred platform, but have no issues jumping into PHP/MySQL code.

You are a good learner, wanting to expand on your already solid programming skill-set. Collaboration is critical to your process. You can effectively assist Project Managers in understanding and communicating the technical possibilities of your solutions. Tasks for this position will span client-side mark-up to database engineering, and everything in between -- you'll wear many developer hats. You have an agnostic attitude towards competing technologies and platforms.

### **Job Responsibilities:**

- Develop and maintain server-side code, as well as design and administer databases for PLY projects.
- Participate in project definition, estimating, technical requirements and specifications.
- Collaborate with creative teams to ensure applications meet creative and functional requirements.
- Assist in defining and developing PLY's in-house applications, establishing methods and best-practices.

### **Requirements:**

#### **Education:**

BS in computer science or similar degree.

#### **Experience:**

2-4 years in computer software design and development. Internet and web site development experience required.

#### **Required Skills:**

- Understands fully the application life cycle (discovery, design, development, deployment)
- Strong understanding of 3-Tier frameworks
- Expertise in Microsoft SQL Server and MS Enterprise Manager
- Server-side scripting in order of importance (C#, T-SQL, XML, PHP, JSP, PERL, ASP)
- Client side scripting (JavaScript, XSLT)
- Knowledge of session management, cookies, and transaction processes
- Good communication skills and works well in a team environment

#### **Preferred Skills:**

- Experience with n-Tier application frameworks
- Familiar with MySQL or Postgresql
- Client-side mark-up (HTML/XHTML, CSS)
- Experience in developing web-based content management systems
- Experience in developing and deploying e-commerce systems
- Familiar with Macromedia ActionScript

#### **PLY's compensation package includes:**

- Competitive salary (compensation will be based on experience)
- Medical, Dental, Vision coverage
- IRA plan
- Bus pass and other reimbursements
- Casual work environment
