

## Web Site Production Artist

PLY Interactive is looking to add to its team an energetic, eager-to-learn, web site production artist. It's required that the candidate has the skills to efficiently produce the front-end components of a web site using standards-based coding methods, including XHTML, CSS, XML, and XSLT and have a strong familiarity with JavaScript. Experience with Adobe Flash is highly desired. Familiarity with more advanced scripting like PHP, C#, Java and ActionScript is also a plus. Good collaboration and communication skills are a must. The candidate should be good self-teacher and can learn quickly to expand on their current skill-set.

### Essential Job Functions:

- Write client-side code for PLY Interactive projects and maintain the front-end of many active client projects.
- Assist the creative team by producing web-ready graphics, including bulk-produced elements like headers, navigation elements, and Flash library elements.
- Collaborate with developers on integrating client-side mark-up with back-end applications and content queries.
- Assist in maintaining, enhancing, and evolving some server-side scripts and templates that drive many of our clients dynamic web sites, primarily written in PHP and C#.

### Education:

At least two years of college-level education with training in interactive design/production or web related subject. Some training in Computer Science would be preferred.

### Experience:

1-2 years experience in building and maintaining a broad range of websites.

### Required Skills:

- Understands web site production life cycle (discovery, design, development, launch, support)
- Strong understanding of common languages (XHTML, CSS, Javascript, XML, XSLT)
- The ability to efficiently write client-side mark-up without the need of a WYSIWYG editor
- Basic design skills with an understanding of layout, color, and typography
- Experience with usability guidelines and user interface design
- Experience with standards-based XHTML and CSS syntax
- Familiar with JavaScript and AJAX libraries
- Familiar with Adobe Flash and ActionScript
- Excellent communication skills

### Preferred Skills:

- Experience with integrating front-end code with back-end systems, both UNIX and Windows-based
- Familiar with server-side scripting languages like PHP, JSP, and C#
- General knowledge of networking protocols like TCP/IP & Ethernet, FTP, SSH, etc.
- Experience with using web-based content management systems
- Experience with Subversion or other code source control tools
- Familiarity with Apple's OSX operating system, and a willingness to become a fluid OSX user

### PLY's compensation package includes:

- Competitive salary (compensation will be based on experience)
- Medical, Dental, Vision coverage
- IRA plan
- Bus pass and other reimbursements
- Casual work environment
